

2009-2010 Conservation Scorecard
for the Missouri Legislature

Dear Friends of Missouri's Environment:

We care and we're watching.

That's the message we are sending to every state legislator. The millions of Missourians who care about safeguarding our vital natural resources are watching how our lawmakers represent their values in Jefferson City. That's why MVC publishes its yearly Conservation Scorecard to hold state senators and representatives accountable for their votes on key environmental bills that arise during the annual legislative session. Their decisions help determine the purity of our water and air; the energy efficiency of our buildings; the fate of our climate; the health of our citizens; and the energy sources that power our homes and businesses. What could be more important?

This sixth edition of our non-partisan Conservation Scorecard will help you know if your elected officials reflect your conservation values. It reviews the votes of every state legislator on key environmental bills in 2009 and 2010. After you consult our Vote Chart (p. 9), please call or write your representatives to let them know what you think of their voting record. It's vitally important they hear from you.

Missouri needs leaders with the vision to create a safe, clean environment for all of us. Thanks for doing your part.

Sincerely,

Liz Forrestal

Liz Forrestal
Executive Director

About this Scorecard

The 2009-2010 Conservation Scorecard is divided into three major sections:

- A brief description of environmental legislation. This includes the many bills we tracked in 2010 (divided into Successes and Disappointments) as well as the bills we scored for 2009.
- A list of selected legislators whom we recognize for their "Good Deeds" or as "Out of Step" with strong environmental values.
- A Vote Chart listing how each state representative and senator voted on selected environmental bills in 2009 and 2010.

(Important note: the Vote Chart does not include all bills that MVC tracks. Some die in committee before coming for a vote in the full chamber. Some are omnibus bills that feature a range of measures – some good, some bad – and we omit such ambiguous votes. For instance, our end-of-session victory on the PACE measure, which helps Missourians invest in energy efficiency, was part of the omnibus bill HB 1692 which had other less-than-desirable sections. So we did not score votes on this bill.)

REVIEW OF 2010 AND 2009 ENVIRONMENTAL LEGISLATION

You'll notice this issue of the Conservation Scorecard covers the past *two* years of the Missouri legislature. A two-year review parallels the full term of current House members, providing a clearer picture of these legislators' records.

The conservation community scored some victories and some defeats in 2010. Some of our most notable wins included an energy efficiency measure, protection of local community control of factory farms, and defeat of the erstwhile audit privilege measure.

Below is a brief description of the environmental highlights from the 2010 and 2009 legislative sessions. The ● symbol signifies a scored vote.

2010 SUCCESSES:

Property Assessed Clean Energy (PACE):

PACE is a relatively new financing system intended to help building owners defer the upfront costs of energy efficiency improvements or renewable energy installations. The costs are paid back over 15-20 years via a special property tax assessment. PACE policies reduce energy use and greenhouse gas emissions, save ratepayers money, create jobs in the energy and building retrofit trades, and incur no cost to the state. No wonder PACE has been adopted in more than 20 other states.

PACE had bi-partisan support in Jefferson City. Originally introduced by **Rep. Holsman** and **Rep. Storch (HB 2178 and HB 2298)**, the measure was eventually added to **Rep. Schoeller's**

omnibus energy bill (HB 1871) and it passed the House 137 to 9. While PACE and the rest of the omnibus bill was very popular, only one Senator opposed it in committee, **Sen. Ridgeway**. In a last minute reprieve at the end of session, **Sen. Bray** amended PACE to **HB 1692**. The Governor signed the bill into law in early July -- a true victory for MVC and our partners.

Combined Animal Feeding Operations (CAFOs):

In an ongoing battle between pollution-intensive factory farms and local communities who want to regulate them, Missouri Votes Conservation continues to work hard to maintain local community control of CAFOs. We believe counties should have the right to regulate how their land is used.

This year saw the introduction to many bills and amendments of “agriculture advisory committees” consisting of pro-CAFO organizations that would override local control. **Rep. Harris** introduced **Amendment 1 to SB 795**, which would have given local farmers a voice on these “agriculture advisory committees.” This amendment was not adopted.

In the end, the agriculture advisory committee provision was successfully removed from all legislation, or failed to pass.

Agricultural Nuisance Suits:

Rep. Guernsey attempted to protect CAFOs by introducing protection from “nuisance” lawsuits. In **amendment 8 of HB 795**, property owners whose properties were affected by CAFOs would only be able to recover their lost property value, not for “annoyances, discomfort, sickness, or emotional distress.” This amendment was thankfully not adopted.

Urban Farming:

● **Rep. Holsman** introduced **HB 1848**, the Urban Farming Taskforce bill, which passed the House 131-30 and later passed the Senate unanimously. The taskforce will make recommendations regarding urban farm co-ops, vertical farming and sustainable communities.

Complete Streets:

Complete Streets policies call for public entities to consider bicycle and pedestrian transportation when developing or upgrading streets and highways. **HCR 67**, introduced by **Rep. Sutherland**, asks the Missouri Department of Transportation to investigate creating road systems that are open to all modes of transportation. MVC was pleased this measure passed the full House this year and is hopeful it will pass both chambers next year.

Landfills:

Yard waste is currently banned from Missouri landfills, freeing up space for non-biodegradable and non-recyclable waste. The diverted yard waste is then composted and used in homes and farms across the state. **HB 1861** called for yard waste to be returned to landfills. The increased organic matter in landfills would have increased methane production, a greenhouse gas. Fortunately, the measure was not adopted.

Dirty Secrets:

In a recurring theme, **Rep. Bivins** once again introduced his audit privilege (aka “Dirty Secrets”) bill. **HB 1974** would have permitted companies that self-report environmental spills and other incidents to receive immunity from prosecution.

As it has in the past, MVC once again opposed audit privilege. In an attempt to by-pass our opposition, **Rep. Bivins** attached it to **HB 1871**, an energy omnibus bill we supported. ● Thankfully, **Rep. Rucker** once again offered an amendment to delete it on the floor.

2010 DISAPPOINTMENTS:

Water Pollution Permit Fees:

Missouri’s water pollution permit fees have not been increased since 2000. And while current fees are insufficient for adequate monitoring and enforcement of water quality, **HB 2109** introduced by **Rep. Ruzicka** would at least have extended the current fee structure. The bill passed the House 141-8. Unfortunately **Sen. Lager** loaded up the measure with damaging language on water quality that jeopardized the bill. The result: the water permit fee system is set to expire at the end of 2010. This means the already underfunded water program is in danger of a federal takeover from the EPA.

Federal Climate Change Regulation:

● **HCR 46 and SCR 46**, introduced by **Rep. Funderburk** and **Sen. Stouffer** respectively, called on Missouri’s Congressional delegation to oppose the federal EPA’s ability to regulate CO2 and other greenhouse gasses. While the resolutions were non-binding, they provided a forum for climate deniers to tell Washington, DC, that Missouri doesn’t consider climate change a serious problem. The resolutions passed both chambers.

Renewable Energy Definition:

When Missourians approved Proposition C in 2008, they told utilities that we want our electricity produced with more renewable energy, specifically wind and solar power. MVC believes the original intent of voters should be honored.

This year saw lawmakers trying to expand the definition of renewables to include nuclear energy (**HB 1851** sponsored by **Rep. Nolte**), methane and thermal depolymerization (**SB 848** sponsored by **Senator Barnitz**).

The nuclear bill never advanced. **Rep. McClanahan** offered amendments in the Agriculture Committee and on the floor; they did not receive a vote.

● **Senator Bray** tried to improve the methane measure by offering an amendment on **SB 848** that would “ramp up” the renewable standards portfolio of Prop C. Unfortunately, her amendment didn’t pass. ● The methane measure was eventually absorbed into an omnibus agricultural bill, **SB 795**, which passed both chambers and was sent to the Governor.

2010 DISAPPOINTMENTS: cont'd

Green Building:

A bi-partisan effort to pass green construction standards for state buildings eventually failed in the last days of the 2010 session. **Reps. McNeil and Schoeller** originally co-sponsored **HB 1667**, which called for LEED silver standards for new large state buildings. It was eventually included in the omnibus energy bill **HB 1871**, which passed the House 137-9. Though the green building measure received support in the Senate, opposition to other measures in the omnibus bill kept it from passing.

Industrial Energy Efficiency:

We also managed to line up bi-partisan support for Combined Heat and Power (CHP), a bill that would help industries conserve energy by re-using waste heat from their operations. **Sen. Green** and **Rep. Allen** introduced **SB 957** and **HB**

2311, respectively. The measures never advanced in either chamber but we're hopeful they can gain more support next year.

Statewide Building Energy Codes:

Missouri is currently one of only eight states without an energy building code. To remedy this, **Sen. Bray** and **Rep. Lampe** introduced **SB 746** and **HB 2183** respectively, which would have established a minimum level of energy-smart construction for all new and significant renovation of homes and commercial businesses. Property owners would save money on more energy-efficient buildings. Both bills died before reaching the floor.

State Parks:

For the second straight year, the legislature failed to rescue Missouri's state parks, many of which are badly in need of infrastructure improvements. **Rep. Kelly's HJR 77**, an \$800 million bond initiative for improvements to state parks, facilities

and infrastructure, was tabled before it ever made it to committee. With low tax revenue and pending budget cuts, the legislature was unwilling to take on more state debt.

2009 YEAR IN REVIEW: SCORED VOTES

The following is a brief description of the bills we scored for 2009. Please visit our website (<http://movotesconservation.org/scorecard.aspx>) for more details on these bills.

● **HB 661 (Omnibus DNR):**

This omnibus bill pertaining to the state Department of Natural Resources included: an extension of waste tire disposal fees; distribution of federal stimulus funds for drinking water; an Energy Futures fund; and authorization for energy efficiency grants from the federal government.

● **HB 734 (Water Fees, Energy Fund):**

This bill extended Water Pollution Permit fees for one year; required that the state purchase Energy Star® appliances; required green building standards for new state buildings.

● **Rucker Amendment to HB 978 (Dirty Secrets):**

Rep. Martin Rucker came to the aid of the environment by working to remove the audit privilege or "dirty secrets" measure (p. 3) from **HB 978**.

● **HB 250 (Horseback Riding on Trails):**

The original bill that passed the House was overly permissive. Fortunately, changes made in the Senate (that the House concurred with) made **HB 250** an acceptable bill.

2010 LEGISLATIVE STANDOUTS

How do you know if your state senator or representative is a true conservation leader, someone who represents YOUR environmental values in Jefferson City? MVC's legislative voting record (p. 9) is one way, but it only tells the story of the bills or amendments that received a recorded vote. On the following page, we congratulate those committed lawmakers from both sides of the aisle who introduced important bills, who had influence on committees, or who sponsored significant amendments in 2010. We also make note of "Out of Step" legislators whom we're hoping will become better environmental stewards in the future.

✓ GOOD DEEDS:

Rep. Martin Rucker:

Sponsored an amendment removing audit privilege (p. 3) from an otherwise good environmental bill.

Rep. Shane Schoeller:

Adopted PACE (p. 2) and LEED silver (p. 4) in his Energy omnibus bill

Sen. Tim Green:

Introduced Combined Heat and Power bill (p. 5) in the Senate

Rep. Sue Allen:

Introduced Combined Heat and Power bill (p. 5) in the House

Rep. Jason Holsman:

Introduced PACE (p. 2); sponsored Urban Farming Taskforce bill (p. 3)

Rep. Rachel Storch:

Introduced PACE in House

Rep. Rebecca McClanahan:

Sponsored a renewable energy amendment to protect Prop C (p. 4)

Sen. Jolie Justus:

Championed environmental issues on Senate Commerce, Consumer Protection, Energy and Environment Committee

Rep. Sara Lampe:

Introduced Building Codes bill (p. 5)

Rep. Margo McNeil:

Introduced LEED silver bill (p. 4)

Rep. Jeanette Mott Oxford:

Opposed anti-climate change bill both in committee and on House floor (p. 4)

Rep. Chris Kelly:

Added state parks improvements to bonding bill (p. 5)

✗ OUT OF STEP:

Rep. Doug Funderburk:

Introduced the anti-climate change resolution in the House (p. 4)

Sen. Bill Stouffer:

Introduced the anti-climate change resolution in the Senate (p. 4)

Sen. Luann Ridgeway:

Attempted to block passage of PACE (p. 2)

Sen. Brad Lager:

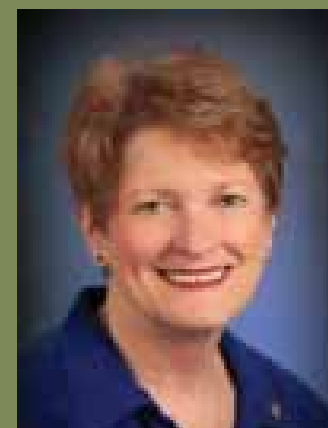

Allowed Water Pollution Permits to expire, putting Missouri's waters at risk (p. 4)

Rep. Frank Barnitz:

Expanded the definition of "renewable" in the Prop C renewable energy standards to include methane and other energy sources (p. 4)

Rep. Jerry Nolte:

Expanded the definition of "renewable" in the Prop C renewable energy standards to include nuclear energy (p. 4)

GOODBYE TO A CHAMPION OF MISSOURI'S ENVIRONMENT:

Term limits have sadly claimed a long-time environmental champion: **Senator Joan Bray**. Environmental advocates were fortunate to have Senator Bray serve as an influential member of the Senate Commerce, Consumer Protection, Energy and Environment Committee. With her 10 years of experience in the Missouri House followed by another eight years in the Senate, she was a champion for our causes and had the skill to keep our legislation moving. Her passion and wealth of experience will be sorely missed.

2010-2009 Legislative Vote Chart

We encourage you to refer to this chart to examine the environmental voting record of your state Senator and Representative, and let them know if you agree (or disagree) with their votes. To find out who your elected officials are, please refer to the Contact my Legislator page on MVCQ website (www.movotesconservation.org).

√ = pro-conservation vote
 X = anti-conservation vote
 NV = no vote
 (absent or declined to vote)

Ed Smith, Climate Change Coordinator (MVCEF)

Missouri Votes Conservation (MVC) is a non-partisan, statewide organization that focuses on the political arena to achieve sound conservation policy. We advocate for pro-environmental legislation and political candidates in Missouri. MVC is affiliated with the national League of Conservation Voters.

SUPPORT MISSOURI VOTES CONSERVATION

YES! I want to help MVC protect Missouri's natural resources and build the conservation community's voice in the state Capitol.

Enclosed is my contribution of \$50 \$100 \$250 \$500 \$1000 other
Contributions to Missouri Votes Conservation support political action to protect Missouri's resources and are not tax deductible.
